## REPORT OF SCHOOL BOARD.

---

The year just closed has been, on the whole, pleasant and harmonious and marked by quite steady progress. Thirty weeks of instruction have been given in each of the schools in town, and we believe that the teachers, generally, have been earnest and anxious to do good work.

The policy of the town has always been to keep its buildings in good condition, and the voters have been liberal in the appropriations for this purpose. The result is that our school houses are much above the average in attractiveness and equipment—a source of genuine gratification to pupils and citizens.

Friendly cooperation of all concerned is a great factor in successful school work. No one is above criticism, of course, but it should spring from a real desire to help matters and should be judicious, suggestive, courteous. We all have the same interest. The state and town in their provisions for education, parents in their oversight and home influence, teachers and school board in their instruction and administration, have the same problem—the training and developing of the child along correct lines. Possibly there is a tendency to regulate the education of the child too much to the school. The school is one phase of education; it must not be considered the only phase.

It is pleasing to see a fair number of visitors recorded in several registers. That is in the right direction. Visits at the beginning and end of a term, together with occasional calls, will help parents to know just what work is being done by their pupils and will beget general interest.

A high school course is an excellent thing when undertaken after sufficient preparation, and the town is glad to have the young people avail themselves of their privileges in that direction. At the same time it is well to keep in mind

the supreme dignity and importance of the common school and common English studies. It is proper enough to see visions and dreams sometimes, but our pupils should realize that the high school is the complement of, and not a substitute for the common school. Without earnest, persistent work here their higher educational course will be sadly hampered. In this, as in other things, "haste makes waste."

The ancients, who were fond of personifying things, represented Opportunity as a person with winged feet and a single scant forelock indicating that it must be seized as it approached and that once past it could never be overtaken. Our young people are to be congratulated upon *their* opportunity, not so great perhaps as that of some others, but greater than their fathers had and of priceless value. It must be seized, however, at the right moment. There is absolutely no time to waste. Constant attendance should be esteemed a high privilege. Every school day should find each pupil at his desk. To be dilatory, to consider attendance irksome, to be seeking excuses for absence, is to throw away the prize forever.

Finally, the citizens of the town are to be congratulated upon their far-sighted and generous policy of materially enlarging this educational opportunity beyond what the law demands. Not only does state aid depend largely upon this action, but it is a cause for public pride. It is your answer to the children's need; it is for the true interest of the community. We thank you for this liberality and believe the same spirit will prevail in your appropriations for the coming year.

ALBRA FOGG,  
ERVIN W. HODSDON,  
CHARLES A. WIGGIN,

*School Board of Ossipee.*
